WORK EXPERIENCE

Software Engineer

Bilytica

Lahore, Pakistan

Responsibilities / Tasks

- Worked on the design, development, and maintenance of **PayPeople** payroll system using Angular for the front-end, ASP.NET MVC for the back-end, and SQL Server Management Studio (SSMS) for the database.
- Contributed to dynamic and responsive user interfaces using Angular, ensuring a seamless and user-friendly experience for payroll administrators and employees. Utilized Angular components, services, and directives to create a modular and extensible front-end architecture.
- Worked on design and implemented a robust backend using ASP.NET MVC, handling data processing, authentication, and authorization for the payroll application.
- Integrated RESTful APIs to facilitate communication between the front-end and backend components, optimizing data flow and enhancing system performance.
- Worked on database schema using SQL Server Management Studio (SSMS), ensuring efficient storage and retrieval of payroll-related information while maintaining data integrity.
- Demonstrated problem-solving skills by identifying and resolving issues in a timely manner, ensuring minimal disruption to the payroll system's operations.
- Maintained clean and well-organized code by following coding best practices and participating in code reviews.
